# **PROBLEM SOLVER**

#### PROBLEM:

#### Ordinary rubber air hoses are heavy, wear out quickly, and need frequent repair.

This Causes:

- Premature failure due to ripping and tearing.
- Overcrowding of different sized hoses for different jobs.
- Safety hazards from protruding hose clamps.

#### SOLUTION:

### **Barb-Lok® Hose and Fitting System**

- No crimping, hose clamps or special tooling required to build custom hose assemblies.
- 30% lighter than an ordinary rubber air hose.
- Neoprene outer cover is more resistant to oil, chemicals, and abrasion.
- Leak-free connections made in seconds.

BARB-LOK

# **FEATURES:**

- Nitrile inner tube
- Brass Collar
- Low profile
- Compatible with Lawson **Barb-Lok Fittings as part** of an engineered system

# **APPLICATIONS:**

- Compressed air for shop applications such as blowguns and pneumatic tools
- Transfer of fuel, lubricating oils, and water

#### **INDUSTRIES:**

- Agriculture
- Automotive
- Construction
- Equipment rental
- Forestry
- Manufacturing
- Mining
- Oil & Gas
- Utilities
