# **SUPER 77 SPRAY ADHESIVE**

#### **PROBLEM SOLVER**

Many Customers Have Experienced The Following:

#### **PROBLEM:**

### Finding a spray adhesive that works on a variety of surfaces. Many ordinary spray adhesives:

- Aren't effective on porous or irregular surfaces
- Don't allow for repositioning bonded materials
- · Take too long to set up and hold
- Are not safe on sensitive materials such as Styrofoam
- Difficult to control the application and to prevent overspray

## **SOLUTION:**

## **Super 77 Spray Adhesive**

- Bonds a wide variety of materials including wood, metals, glass, fabrics, rubber, vinyl and paper
- When applied on one surface, bonded surfaces may be repositioned
- When applied on both surfaces, delivers a strong permanent bond instantly
- Safe for use on most sensitive surfaces including Styrofoam\*
- Extension tube is included for precise application

"Let me show you how it works"

# **APPLICATIONS:**

- Plastic signs
- Head liners
- Styrofoam insulation
