

PROBLEM SOLVER

PROBLEM:

Cutting These materials can be difficult and require different blades:

- Ceramic
- Concrete
- Wire rope
- Hydraulic hose
- Hardened steel parts
- Stone
- Glass
- Wire-reinforced hose
- Thin and perforated metals

SOLUTION:

Lawson Tungsten Carbide Saw Blades

- Alloy steel back bonded to thousands of tungsten carbide particles prevents binding and snagging.
- Easy starting in harder materials.
- Blade can be reversed for extended life.
- One blade replaces multiple tooth pitches, reducing inventory.

APPLICATIONS:

- Hardened parts such as springs and chrome plated metals
- Wire rope, tow cables and chains
- Perforated metal panels
- Light gauge metals
- Conduit
- Composites
- Plastics
- Glass and fiberglass
- Stone and concrete block
- Ceramic

INDUSTRIES:

- Automotive
- Construction
- Manufacturing
- Marine
- Mining
- Oil & Gas
- Transportation
