

PROBLEM SOLVER

PROBLEM:

Ordinary tarp strap wear and tear too quickly, wasting money.

- They lose their stretch after limited use and at low temperatures.
- They deteriorate quickly when exposed to sunlight, ozone, salt air, and chemicals.
- They leave unsightly black scuff marks.

SOLUTION:

Urethane Rope and Shock Cords

- Resists effects of sunlight, ozone, salt air, and most chemicals.
- Always returns to original length, regardless of how many times it's used.
- Leaves no black scuff marks.
- Nylon/fiberglass hooks are non-marring and will not rust.
- Retains elasticity even at low temperatures (-40 °F/-40 °C)

APPLICATIONS:

- Fleet
- Property Maintenance

INDUSTRIES:

- Agriculture
- Construction
- Forestry
- Marine
- Transportation — Trucks, RVs, Trailers

Cut rope one-third shorter than the finished length

Attach adjustable hooks

Assembled products are ready to use
