

# THIRD POWER™

The Safer Choice for Cleaning  
and Degreasing

## DIRECTIONS FOR USE:

**Cleans and degreases floors, walls, machinery, concrete, kitchen appliances, hoods and utensils, printing presses, stainless steel, porcelain, ceramic and any surface not harmed by water:**

### Heavy Duty Cleaning and Degreasing:

Use Third Power™ at full strength for most applications involving heavy soil, grease and grime deposits. Spray on surface to be cleaned using a trigger sprayer, tank sprayer, or apply to floors with a mop. Allow Third Power™ to penetrate and lift soil for 2 – 3 minutes before agitating with a clean cloth, scrub brush or scrubbing pad. Rinse surface with clean water.

### Medium Duty Cleaning:

Dilute 8 to 12 oz. of Third Power™ per gallon of water. Spray surface and wipe with sponge, wiper, mop or other cleaning cloth.

### Light Duty Cleaning:

Dilute 3 to 6 oz. of Third Power™ per gallon of water. Spray surface and wipe with sponge, wiper, mop or other cleaning cloth.

### Vehicle cleaning:

Dilute 3 oz. of Third Power™ per gallon of water. Apply to cars, trucks, boats or RVs using a sprayer, clean cloth or sponge. Wipe or scrub surface with a non-scratching cloth or sponge and rinse thoroughly.

### Floor Cleaning Using Mop and Bucket or Auto Scrubbing Machine:

For daily cleaning, dilute 3 oz. of Third Power™ per gallon of water. Fill mop bucket or auto-scrubber with diluted solution. Agitate with clean mop or auto-scrubber. Pick up soil and excess water with a clean mop.

Not recommended for glass cleaning. If accidentally applied to glass surfaces, rinse thoroughly with clean water.

HMIS® Hazard Rating: Health 0, Flammability 0, Reactivity 0.

See container label and SDS for additional information.

User takes responsibility for proper use of this label. This label is intended to be used in conjunction with a hazard communication program.
