

PROBLEM SOLVER

PROBLEM:

DRUMMOND®
A LAWSON PRODUCTS BRAND

Managing grease, foul odors, and sewage in lift stations and sewer pits can be challenging.

- Many degreasers sink to the bottom and do not prevent grease buildup.
- Most don't mask offensive odors.
- Most products won't keep pump seal filters clear.

SOLUTION:

Drummond® Clean Buoy Floating Lift Station Degreaser

- Rises and falls with the water line to prevent grease buildup.
- Cleans and maintains without entering the wet well.
- Prevents fouling of ejector station probes and level sensing tubes in lift stations.
- Keeps pump seal filters clear, allowing pumps to run cooler
- Controls odors.
- Won't damage floats, seals, or fittings.

APPLICATIONS:

- Lift stations
- Grease traps
- Septic tanks
- Catch basins
- Concrete wet wells
- Steel wet wells

INDUSTRIES:

- Automotive
- Construction
- Education
- Government
- Hotel
- Manufacturing
- Oil & Gas
- Restaurants
- Transportation
