

PROBLEM SOLVER

PROBLEM:

Many lubricants have difficulty safely removing rusted-on nuts and bolts.

- Lubricants often do not penetrate corroded parts, and bolts break while attempting to loosen.
- Many do not prevent further corrosion and rust.
- Lubricants are often flammable, making them dangerous to use.

DRUMMOND®
A LAWSON PRODUCTS BRAND

SOLUTION:

Drummond® Open and Shut Penetrating Oil

- Penetrates quickly through rust, grease, and water to loosen frozen parts.
- Cleans, lubricates, and protects against further rust and corrosion.
- Non-flammable, non-toxic, and safe to use in high temperatures.

APPLICATIONS:

- Lubricates a wide variety of surfaces such as elevator cables, chains, gears, and door locks.
- Displaces moisture on spark plug wires, bilge pump motors, and battery terminals.
- Protects surfaces from rust and corrosion on metal water meters, swing chains and hand tools, and underwater electrical connectors and switches.
