

### Overview

Radial Bristle Discs can be used in a wide variety of applications for faster, more cost-effective material preparation.

### Features/Benefits

The versatility of the 3" Radial Bristle Disc allows up to four discs to be stacked, giving the operator many options for a variety of uses. Use one disc for hard-to-reach or thin gauge applications. Use up to four for large area applications. The 3" discs come in three grits: 50, 80 and 120. The mandrel has 1/4" shank.

### Applications

- Slot clean-up
- Deburring
- Paint removal
- Hard-to-reach areas
- Surface conditioning
- Scale removal
- Weld clean-up
- Corner clean-up
- Removes adhesive, paint, heavy oxides and surface contaminants
- Light deburring
- Typically used on pneumatic die grinders and electric straight grinders run at high RPM
