

Gold Wax

Kent's Pro Essentials Gold Wax is an all-in-one product; polishes and seals in one step. The combination of fine-milled polishing agents for a consistent cut, silicone polymer blends that deliver exceptional shine, and once cured, gives tight water beading wash after wash. Gold Wax works well in both hot and cold climates, without dusting and wipes off easily.

Use as a standalone product or as the final step in the compounding process.

Features

- Polishes and seals
- Dust free
- Exceptional Shine
- Tight water beading

Directions

Wash and dry vehicle. Clay bar vehicle if needed. Shake well before using. Work on a cool surface. Do not use in direct sunlight or on hot surfaces. Do not allow to freeze.

For best results, apply four small sized drops onto a primed polishing or finishing pad. Work a 2'x 2' section at a time. Use a slow back and forth motion until cream wax begins to break down. Wipe off residue with microfiber towel. Severely neglected finishes may need a second application to remove surface defects.

Available Sizes

1. 16 ounce – 1636328
2. 1 Gallon – 1636329

Recommended Tools

- Tornador T21 Corded Polisher (1636433) or T21C Cordless Polisher (1636434)

Recommended Pads

- White foam polishing pad (1636439) or black euro fiber pad (1636441)
