

# Technical Data Sheet

## Heavy-Duty Chain Lubricant

### Overview

Specially formulated lubricant for all chain and chain drive equipment. Heavy-Duty Chain Lubricant penetrates into chain links and bushings to prevent chain wear and chain slippage.

### Features/Benefits

- Sprays on as a penetrating foam, then dries to a lubricating film
- Non-sling formulation
- Contains extreme pressure additives
- Penetrates into chains and rollers
- Protects against friction and wear
- Keeps chains and pins flexible reducing wear
- Protects against rust and corrosion
- Aerosol spray designed to lubricate hard-to-reach areas
- Reduces friction on sprockets and cutting bars

### Applications

- Penetrates and restores movement of chains, rollers and links
- Lubricates and protects chains, sprockets, rollers and cutting bars
- Chain saws
- Marine and boat
- Forestry service equipment
- Farm implements
- Equipment with outdoor service
- Construction equipment

### Method of Application

- Aerosol

### Identification

- Aerosol, amber liquid

### Sizes

- 16 Fl. Oz. Can Size; 12 Oz. (341g) Net Wt.

### Directions for Use

1. Shake aerosol can well.
2. Lubricant works best when surfaces to be sprayed are free of debris, dirt and moisture.
3. Spray surfaces generously.
4. Wait a few moments for lubricant to penetrate into surface cavities.

### Technical Specifications

- Form: Aerosol
- Color: Amber
- Odor: Petroleum/solvent
- Reportable VOC Content: 24.5% by weight
- Shelf Life: Minimum one year
- HMIS: H:2 F:4 pH:0
