

Zinc Plus Weld-Through Primer Testing & Results

This bulletin is proprietary information of Kent Automotive.

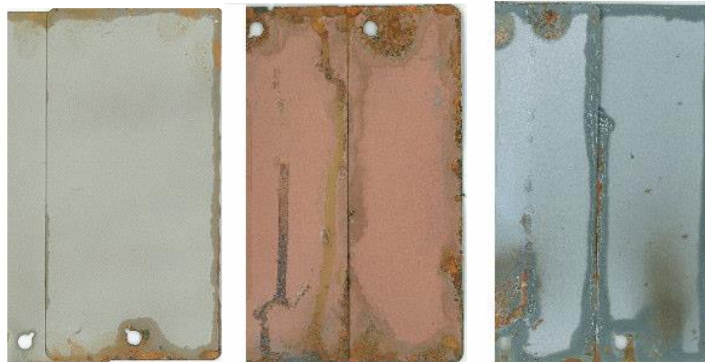

An independent laboratory compared the following three different weld-through primers:

1. **Kent Zinc Plus Weld-Through Primer – KT13821**
2. Competitor #1
3. Competitor #2

Each welded test panel was prepped and had product applied according to the instructions on the can. The welded test panels were then exposed to the ASTM-B117 Standard Salt Spray Test for 500 hours. The results of the testing are shown below.

ASTM-B117 Standard Salt Spray Test After 500 hours

(Results in order from 1-3)

8770 W. Bryn Mawr, Suite 900, Chicago, IL 60631-3515
